

ADD-ON  
WIRELESS  
LOUDSPEAKER

## AVAILABLE COLORS:

-  Black anodized Aluminium
-  Shiny Copper
-  Aluminium Silver

The TANA L-1 is an add-on wireless loudspeaker, very easily combined with the main loudspeaker TANA SL-1. It can be used to create high quality stereo sound with enhanced depth, vibrancy and realism in multiple rooms. TANA L-1 is not just an active loudspeaker, it is the result of mixing timeless Scandinavian design with forty years of experience in sound and technology.

Where many other compact systems use electronic Class-D amplifiers and simple equalizers, we incorporate analog Class-AB amplifiers and sophisticated signal processing. Because in the end, music really matters.

## REQUIREMENTS

- EC Living model with streamer, e.g. EC Living TANA SL or RENA.
