

# *AURALiC Debuts New ALTAIR G1 Digital Audio Streamer at Munich High-End 2019*

**Munich May 8th, 2019** – Cementing its reputation for developing high-performance digital sources, AURALiC will unveil a new addition to the critically acclaimed G1 Series of products at the Munich High-End Audio show this year. Continuing its tradition as a high-performance wireless streamer, the updated and enhanced **ALTAIR G1** will debut at the MOC venue in Munich from May 9th to May 12th at Atrium 4 2.0G E211.

As a premium digital hub for any high-performance system, the ALTAIR G1 software and hardware functions in much the same way as the original ALTAIR, able to act as a preamp, a DAC, a streamer, and an all-in-one digital source, but is also now fitted with the G1 chassis, providing a matching 4-inch color display and Smart IR feature.

As a digital audio streamer, ALTAIR G1 has received several updates from both the G1 and G2 series of products. It now uses the ESS 9038Q2M conversion chip, providing the user with more detail and perceived resolution than ever before. To match the higher

levels of performance available from this new DAC chip, the analog circuitry received necessary parts upgrades and an improved layout for a balanced presentation.

Finally, the processor platform has been upgraded to Tesla G2 from Tesla G1, featuring 2GB of system memory, providing the user with a seamless, powerful experience.

An internal storage option remains, and for a fee an upgrade kit can be provided to the dealer or the customer, allowing for robust, local storage of large music collections in any number of formats and resolutions.

As a digital hub, the ALTAIR G1 still functions as a Roon Endpoint, can stream subscription music services such as Tidal, Qobuz and Spotify Connect, and offers Bluetooth, Airplay, and SongCast for a multifaceted and varied set of feature needs.

ALTAIR EU Retail will be €2,199, UK Retail will be £1,899, US Retail will be \$2,499, and will be available for purchase in July/August 2019.

## ***About AURALiC***

Founded in 2009, AURALiC has established a worldwide reputation for creating innovative digital audio components of the highest quality. AURALiC's elegantly-crafted products combine classic analog designs with cutting-edge digital technologies to forge new pathways into the future of high-end audio.

AURALiC's seamlessly integrated hardware and control software provide effortless command of high-resolution music playback throughout the home. Whether streaming from Internet services or local music collections, AURALiC components let you discover, share and connect like never before, expanding the horizons of your audio system with new levels of functionality and performance.
